the Decryptek scanner

The First All-In-One ID Scanning and Authentication Solution

We Provide Solutions For Industries Including:

- Banking/Financial
- Access Control/ Visitor Management
- Retail
- Hospitality
- Casinos/Gaming
- Disaster Management
- Mortgage/Title/Notary

WeScanIDs is an industry leader in providing ID verification solutions. Our Decryptek Scanner is a revolutionary device: the first available that combines multiple security technologies, providing an all-in-one scanning and authentication solution for businesses.

The Decryptek Scanner was developed to address the increasing problems of identity theft and fraudulent IDs. The need to verify identity and authenticate ID documents has never been more critical, as crime continues to rise.

In addition to authenticating IDs, we believe that the Decryptek Scanner can serve as a gateway to any system that has the requirement to verify ID. This solution will streamline data entry, providing you with more accurate information, free of keystroke error. Using the device to scan and authenticate IDs can protect your business.

Please contact us to discuss how the Decryptek Scanner can benefit your business.
